EVERY INCIDENTAL CATCH OF MARINE MAMMALS MUST BE REPORTED IN THE PRESCRIBED MANNER IN THE FRAMEWORK OF THE OBLIGATION OF CATCH REPORTING IN SEA FISHING!

Additionally, report the finding through the Reporting System via the following [form](#):

In case of catching a **live and uninjured** dolphin: release the animal from the fishing gear and release it back into the sea.

In case of catching an **injured** dolphin, if you must lift the animal onto the deck, do so by lifting its entire body at once.

In case of catching an **injured and dead animal**: call the number: 112 and follow the instructions!

DO NOT cover the dolphin's eyes and blowhole!

DO NOT expose the animal to the sun and keep its skin moist!

DO NOT expose yourself to unnecessary risks - be careful because marine mammals can transmit infectious diseases!
